Sector 03, Uttara, Dhaka - 1230, Bangladesh

OBJECTIVE

Java Developer with hands on expertise in Spring Boot and backend system design, specializing in scalable, high performance applications and robust API development. Skilled at optimizing data driven solutions and integrating modern technologies to solve real world engineering challenges. Actively expanding knowledge of enterprise platforms like Salesforce and SAP to connect technical development with broader business strategy. Known for clean, maintainable code and strong collaboration within agile teams.

EXPERIENCE

- **BJIT Ltd.**  September 2026 - Present
Trainee Software Engineer Dhaka, Bangladesh
 - Gained hands-on experience with ERP, Salesforce, and SAP enterprise platforms.
 - Assisted in implementing business workflows, system configurations, and software solutions.
 - Used Redmine and Jira for task management, issue tracking, and project coordination.
 - Participated in requirement analysis, functional testing, debugging, and technical documentation.
 - Applied Agile, SDLC, version control, and software implementation practices.
- **Software Gaze**  September 2025 - August 2026
Junior Software Engineer Dhaka, Bangladesh
 - Contributed to an internal office management portal for secure employee and organizational management.
 - Implemented role-based access control with JWT authentication for secure user access.
 - Built real-time group and private chat functionality using WebSocket.
 - Designed and integrated backend APIs with frontend components using Spring Boot and React.

EDUCATION

- **B.Sc. in Software Engineering** 2022 – July 2026
Daffodil International University Dhaka, Bangladesh
 - CGPA: 3.70/4.00
- **Higher Secondary Certificate (H.S.C)** 2018 – 2020
Rangpur Chamber of Commerce Industry Public School & College Rangpur, Bangladesh
 - Group: Science
 - GPA: 4.83/5.00

PROJECTS

- **Software Gaze HR (Enterprise HR & Client Support Platform)** April 2026 – July 2026
Tech Stack: Java, Spring Boot, Spring Security (JWT), JPA, WebSocket, React, Vite, PostgreSQL, Docker, Git 
 - Developed a full-stack HR and office management platform featuring secure role-based access control for administrators, employees, clients, and support teams.
 - Implemented a payroll management system for salary processing, payroll tracking, and financial record management.
 - Implemented a full-fledged Attendance Management System.
 - Designed a real-time client support system using WebSocket technology, enabling instant communication and live status updates with support ticket generation and tracking.
 - Integrated Spring Security JWT authentication and authorization to ensure secure access across multiple user roles.

- **Smart Depot (Depot Management System):**

January 2026

Tech Stack: Java, Spring Boot, JPA, React, PostgreSQL, Git

- Developed a full-stack depot management system for tracking incoming and outgoing chalan operations
- Implemented real-time stock management with automatic updates and validation to prevent negative inventory
- Built dealer management system with deposit and due calculation integrated into each transaction
- Designed scalable backend architecture with business rule validation and auto-generated chalan numbers

- **Software Gaze(In-House Office Management Portal):**

November 2025

Tech Stack: Java, Spring Boot, Spring Security (JWT), JPA, Docker, React, Vite, PostgreSQL, Git

- Built a full-stack office management system with secure role-based access (Spring Security JWT) and separate Admin/User portals.
- Developed employee, attendance (work hours, overtime), and expense (tracking, PDF reports) management modules.

SKILLS

- **Programming Knowledge:** Java, Apex, Python, C
- **Frameworks:** Spring Boot
- **Tools & Technologies:** Maven, Gradle, IntelliJ IDEA, VS Code, Overleaf
- **Database Management:** PostgreSQL, MySQL, H2, Hibernate & JPA, JDBC
- **Web:** React, HTML5, CSS3, Bootstrap, Thymeleaf
- **Project Management & Issue Tracking:** Jira, Redmine
- **DevOps & Version Control:** Git, GitHub, Docker

VOLUNTEER EXPERIENCE

- **Volunteer- Code Trap Programming Contest**

February 2024

Software Engineering Club, DIU

- Volunteered for the Code Trap Programming Contest, aiding in the smooth execution of the event by managing contestant registrations, providing technical assistance, and ensuring a seamless competition experience.

- **Volunteer – International Cyber Security Day**

April 2023

Cyber Security Center, DIU

- Contributing to event coordination by managing time schedules, assisting in program design, and supporting overall event organization and execution to ensure smooth operations.

CERTIFICATIONS

- **IBM Machine Learning With Python – Coursera, August 2025**
- **AWS Academy Graduate – Machine Learning Foundations – Credly, July 2025**

LANGUAGES

- **English:** Professional Working Proficiency
- **Bangla:** Native or Bilingual Proficiency
